

SMART Support™ by InstruLogic lets you **work smarter, manage resources smarter** and **budget smarter.**

Work Smarter

With all the new challenges of managing your treatment operations, the last thing you need is another problem to solve. So let InstruLogic take Measurement & Control problems off your plate so you can focus on more pressing matters. That's **Working SMART!**

Manage Resources Smarter

Many of our services are designed to **prevent problems before they impact your operations.** Done regularly, they increase system availability, extend system lifecycle, minimize service interruption and regulatory incidents. These are things that often get neglected in challenging times. Preventing problems is **Managing SMART!**

Budget Smarter

SMART support also puts you in control of your budget with a variety of service levels tailored to fit your needs.

- **On Demand** is our non-contract service option. All services are available at the prevailing service rate at time of request.
- The **Calibration Plus** agreement provides calibration services at a reduced rate and extends similarly reduced rates to other InstruLogic Services for the duration of the agreement. **Calibration plus** customers also benefit from guaranteed response times when requesting repair services.
- Our **Prime Service** agreement provides qualified customers with our lowest rates and best response times. Each agreement is customized to deliver the best value for your operations. In addition, Prime Customers enjoy flexible payment options.
- **Inflation protection** allows contract customers to lock-in pricing for the duration of the agreement.

Structuring service levels that meet your budgetary needs is **Budgeting Smart.**

SMART Support™ by InstruLogic

System Management Assures Reliable Treatment

SMART Support Agreements

	Demand	Calibration +	Prime
Calibration Services *	\$1560/Day	\$1272/Day	\$1136/Day
